PROJECTS

Facial Detection , Gesture Recognition, Voice Detection, Emotion Recognition

- Technologies: Python, Numpy, Pandas, Scikit-learn
- This project integrates facial detection, gesture recognition, voice detection, and emotion recognition to create an intelligent system that interprets human expressions and actions. It enhances human-computer interaction by accurately identifying faces, analyzing gestures, processing voice commands, and detecting emotional states in real time for adaptive responses.

Smart Resume Analysis

- Technologies: Python, Scikit learn, SpaCy, Flask
- Smart Resume Analysis uses Natural Language Processing (NLP) and Machine Learning (ML) to automatically evaluate and rank resumes. It extracts key skills, experience, and qualifications, matching them against job requirements to streamline recruitment, improve candidate selection, and reduce hiring time.
